

Appendix 1 – Data of card purchases from register Roncioni 362

The tables below consist of four columns, with the following contents: in the first column we read the date as mmdd, the number of packs for ordinary cards is listed in the second, and for Minchiate in the third; the fourth column is dedicated to the total cost in L.s.d. Additional information has been added for particular cases, as specified with the corresponding signs after the date: F for cards directly acquired in Florence, * in a few cases in which I have inverted the ordinary/Minchiate attribution of the register.

Appendix 2 – Incomes from used cards sold

As before, the first column shows the date (yymmdd), the second packs of ordinary cards, the third of Minchiate, the fourth the corresponding income in L.s.d. (A letter M after the date indicates that the purchaser was Giovanni Mannoni, the landlord of the Casino rooms.)
